1)Teachers need to communicate with students very calmly. 2) Teachers should listen & try to solve the problem of a student.
बहुत अच्छे सहमत फुल निर्भर
...
All right
As a first year student I have observed that the institution should be more open to providing more information and exposure to students through live seminars, webinars and extra curricular activities.
Doubt classes
Not time form submit

1. Improvisation needed in Student-teacher interaction .2 Cleanliness of the institution and basic commodities should be taken care of 3. Students should be taught about soft skill , employability skills by engaging them in more and more practical work

Doubt sessions, frndly environment with students , time to time class test

Proper cleaning of the department should be there.... Maintenance of the department... E-message should be there to regularly update students.

yes

Communication skills, punctuality of students, cleanliness.

(1) projector par padhaye with examples.(2)

All teachers are good. .

Teaching should be done in both hindi and english ..

Encourage cooperative learning , communicate with parents, teaching a topic while taking day to day examples

Teachers must use examples to explain more thoroughly to the students.They must explain take regular classes of the students.They must use more methods of teaching and explaining properly.

Everything is good, I think there is no any mistake by teachers they are performing very well in their job, Some Teachers like Dr. Tabassum Ma'am are really very good they help to every student and solve their problems, When Some Teachers communicate with us we feel like we are talking to our parents and they try to show every possible way which is good for us,

Try new things

(1.)Teachers should use ICT tools such as projectors, multimedia etc for making student easy to understand. (2.) Teachers should encourage student for extra curricular activities so that students get experience from them. (3.)Teachers should find students weakness so that he/she can help the student to overcome it.

Value the child's answer, understand the students students in your class room,

Teachers always take classes in time

Yesh

Teacher always take classes at time

All teachers are great nothing to suggest 🙏

1-use better graphics and visual media to engage students well . 2- Teachers can also communicate with students' parents because Parents play an absolutely vital role in their children's education.

Our institution teaching system is very good overall i agree and fully satisfied with our institution teaching system

Drinking Facilities , Washroom Facilities , Transportation

Completely educated

Use the projector teaching time and myke and speakers

encourage cooperative learning among students. use digital tools and presentation for explaining topic. class time should increase .

B.ed

They should use the Technology as the time we are in is the IT age aur AI age. & Teachers should take time in explaining the topic, i have seen many teachers saying that the teacher's lectures are available on YouTube and this means the syllabus has been finished , as you know we are in Post covid Phase , the students concepts have not been clear thoroughly, so the teachers should emphasise on the quality of learning

More curricular activities should be introduced.

Making discipline

It should be more student friendly . Also much of technology should be there the old things are to be updated with modern ones so that we could learn thing in more effective way. Timely softskill classes can also be a good thing. All lectures should be 2way 😊
